Ottawa, ON, Canada

ImStrat Corporation signs training agreement for ERDAS training with Intergraph Canada Ltd.

ImStrat Corporation is pleased to announce that a formal agreement has been signed with Intergraph Canada Ltd to supply training services and expertise for ERDAS Imagine. Intergraph's Canadian federal government clients will have access to ImStrat Corporation's training personnel as and when required. Training will be available at Intergraph's facilities, ImStrat's training facilities or conducted at the client's site.

"The agreement with Intergraph Canada enables ImStrat Corporation to supply its training knowledge and expertise in Canada to the existing ERDAS user community and to be an additional training resource to Intergraph Canada says President Tom Last."

"Intergraph Canada is pleased with this new relationship with ImStrat Corporation, says Rob Patten, V.P. & G.M. for Intergraph Canada. Providing timing and quality services to our customers is a key commitment and we are excited that ImStrat is onboard to assist."

ImStrat Corporation is a privately held Canadian defence company that has been providing Intelligence and Geospatial Intelligence (GEOINT) Analysis training to both Canadian and international military personnel since 1997. ImStrat's personnel come from Canadian and European NATO military backgrounds. Our programs and training courses follow Canadian military and NATO standards. We continue to meet our demanding ongoing annual and multi- year training commitments to our clients with the highest professional standards. Whether your organization requires the development of a GEOINT capability or annual customized courses such as UAV imagery analysis, we can accommodate your specific training requirements
